

FELLOWES Helios 60

Thermal Binder

Large Office Thermal Binder - For Heavy Use

- ThermoSense automatically detects the document(s) thickness and selects optimum binding cycle
- HeatShield safety barrier prevents accidental user contact with the heating plate
- Audio and visual indicators clearly signal when ready to bind
- Automatically shuts off when not in use to reduce energy consumption
- Binds multiple documents up to a combined size of 60mm or 600 sheets
- Folds flat for storage

Unique features

SPECIFICATIONS

Model Name	Binding Capacity	Combined Thickness	Warm-Up Time	Variable Heat Cycle	Multiple Binding
Helios 60	600 sheets	60mm	4mins	Yes (ThermoSense)	Yes

Quality Office Products Since 1917

FELLOWES Helios 60

Unique Features

User-friendly audio and visual indicators facilitate the binding process

Safety barrier prevents user contact with the heating plate. The barrier is opened manually and closes automatically

Automatically shuts down during periods of inactivity to reduce energy consumption

Automatically finds the optimum heat / time combination for the total document size

How does the Helios 60 work...

- 1 The binding clamp pulls open, enabling the documents to be inserted into the binder. With the document standing on the heating element, the binding clamp can then return to support the documents during the binding cycle.
- 2 Opening the binding clamp activates ThermoSense. This feature automatically detects the total thickness of any document and sets the binding cycle accordingly.
- 3 The binding clamp includes the HeatShield feature, a safety barrier to prevent users touching the heated plate during the binding cycle.
- 4 The user can observe the binding progress and is alerted when the cycle is complete.
